

Committee Newsletter – May 2016

Items from the Committee Meeting held Tuesday 17th May to be read at all sessions during the week commencing Monday 23rd May.

1. Two new members were elected at the Committee Meeting held last Tuesday: Colleen Thurston and Ali Fullerton-Smith

Please ensure these new members are made very welcome.

The Club now has 211 registered members.

2. We are indebted to Derek Rankin for the development of a new and far superior Club website. Please refer to the website not only for session results, but also to view the monthly newsletter and other relevant information for members, prospective members and visitors.

3. We expect the replacement air conditioning system to be installed within a week or two, weather permitting. For the roof to be opened a couple of forecast rain free days will be required.

4. The second monthly Sunday afternoon bridge session, held last Sunday, was again well attended. The next session will be held on Sunday 19th June. Thanks to Rosemary for organising and directing this series of trial Winter sessions.

4. Remember to mark on your calendar that the United Travel mid Winter Bridge and Dinner will be held on Sunday 26th June. An entry form will be put up on the notice board next week.

5. The Committee has decided to relax the use of the timer. It will continue to be used at evening sessions but its usage at daytime sessions will be at the discretion of the director.

6. The Club is not in a position to consider introducing an additional bridge session as has been suggested from time to time. In fact if we don't get more members willing to direct Club sessions, it may not be possible to continue with all existing sessions.

We need more directors.

Anyone interested should let me know. It is not an arduous job and tuition is available.

7. Only one suggestion for a new Roadside sign has been received. This suggested design is posted in the notice board. If anyone does not like this design and has what they consider to be a better design, please let me know.
